

# Dry Riverbed Landscaping

## A unique drainage solution that improves appearance and reduces maintenance

- Various rock & stone sizes mimic a natural setting
- We install landscape fabric to prevent rock from settling over time
- Custom designed to individual requirements and installed to approved specifications
- We do the work by hand, creating the least disturbance to your property
- Greenleaf's workcrews are committed to YOUR satisfaction

A dry riverbed can be used in a landscape for a variety of reasons. Sometimes, it's just the right "look" for your setting. Often, it is a perfect solution for a persistent drainage problem.

We first meet with you on site to talk over the reasons for adding a riverbed to your landscape. Only then can we design the best look and function to fit your situation.

We provide a firm bid detailing the specific materials we recommend and include pictures or samples when needed.

Our Greenleaf work crews do most of the work manually, minimizing stress to other parts of your property. We leave the job site tidy at the end of each day and complete the project as quickly and efficiently as possible.
