

Landscape Design and Installation

Rejuvenate an old landscape or create a whole new look from scratch

- Formal design or simple sketch to suit your budget and style
- Computer image design available using an actual photo of your property
- Detailed itemized scope of project with firm bid
- Custom bid as you like it...lump sum, in stages, or with options
- Expert installation and advice with a warranty to “back it up”

We start the design process by getting to know you and your garden. We'll ask questions, take measurements, get a feel for your specific wants and learn how the space will be used.

When we agree on a plan, you will receive a formal proposal including a complete scope of work and photographs personalized to your specifications. As we review the design with you, we can make changes or adjustments if needed, often on the spot!

Our objective is to complete projects as a unit so that you are living with a site that looks as finished as possible during every step of the process.

Once we finalize the details, we oversee our experienced work crews and assure they complete the project as proposed, correctly and in a timely fashion.
